

# Swan Systems Sliding Wardrobe Doors

## The Technical Stuff

Swan Systems recommend that our sliding doors are installed with a matching colour sub-frame and floor plinth. We level the floor plinth and apply the bottom cill removing the need for unsightly screws.

### Interiors

A comprehensive range of interiors are made to suit your every need. Please talk to your Sales Designer about what storage you are looking to create.

Our new range of lightweight aluminium interiors come with matching colour shelves and drawer packs

Our Beech Range of Interiors can create extra storage inside your Swan Sliding Wardrobe

### Technical Information

- Our MDF profile comes wrapped in a choice of colours (high gloss, paper foil) and is stiffened with aluminium extrusion to house either 4mm British safety backed mirror or coloured glass, 15mm or 18mm for MDF or MFC panels.
- Our profile totally conceals the aluminium extrusion creating a solid and rigid system which is at home in the most elegant bedroom.
- Complimenting Swan Bedroom Furniture.
- The bottom rollers are closed, grease packed ball bearing rollers, fixed to the bottom of the door which enables the weight of the door to be carried along the bottom track. There is no weight suspended from your ceiling.
- Our track set is specifically designed for our product.
- Top track is in white, which is then concealed with a cover trim to match door frame.
- Bottom cill – a range of optional colours are available.
- Our new soft close unit is exclusively designed for the Swan Systems Sliding Wardrobe Door - automatically shutting the doors with a gentle push.

## Door Designs

### Why are Swan Systems Sliding Wardrobe Doors unique?

In 1998 we were awarded a British Patent for the technical originality of the Swan Systems door frame. Our product uses a combination of MDF profiles and aluminium extrusions to create a solid and rigid system. The product is available in 4mm to create mirrored or glass doors or 15mm or 18mm to create panelled doors. We have available a brilliant soft close unit designed just for Swan Systems Sliding Wardrobe Doors – automatically shutting the doors with a gentle push. **Swan Systems Sliding Wardrobe Doors are beautiful, state of the art storage doors.**

To you, the customer, this gives you a wide choice of colours and finishes for the frame of your wardrobe doors – mixed with a variety of door designs. Our unique difference is you could match the Swan Systems Sliding Wardrobe Doors with any new bedroom furniture your retailer may offer. Creating a harmonised bedroom, made to measure, made to last and made for you.

The colours and finishes in the Swan range evolve constantly, please ask to see the latest colour swatch book

### The Contemporary Look

Swan Systems Sliding Doors installed with complimentary bedroom furniture.

### The Traditional Look

Swan Systems Sliding Doors are installed to compliment a fitted bedroom.

### Creative Door Ideas

A full run wall to wall of mirrored doors will reflect a lighter, more spacious room. There are lots of other door designs in the Swan Systems Sliding door range to allow you to unleash your creative side:

- Sculpted Panel doors - flush panel doors or sculpted in various colours and designs
- Mirrored doors - silver, bronze, etched or frosted
- Coloured glass - various colours in plain or floral designs
- Oriental doors - on coloured glass, mirror or panel doors
- Modern design doors - a bespoke split door option
- High gloss frames - The high gloss range from Swan, ultra modern and very stylish.

The images in this brochure are examples of Swan Systems Sliding Wardrobe Doors, taken in our customers' houses to show you the creative possibilities.
